

Physiolibrary - Bug #218

Are parameter dependent annotation values legal?

25 February 2015 20:51 - Tomáš Kulhánek

Description			
I guess it is not legal to set parameter dependent annotation values like Physiolibrary.Chemical.Interfaces.ConditionalVolume.useNormalizedVolume. <pre>```mo parameter Boolean useNormalizedVolume = true "Normalized volume of solution is 1 liter" annotation(Evaluate=true, HideResult=true, choices(__Dymola_checkBox=true),Dialog(group="External inputs/outputs")); Types.Volume volume "Solution volume" annotation(HideResult=useNormalizedVolume); ```</pre>
