- Target version set to Psychotest2

#2 - 01 July 2015 17:46 - Tomáš Kulhánek

- Category set to HTML5 client
- Assignee changed from Marek Frič to Tomáš Kulhánek

#3 - 01 July 2015 18:18 - Tomáš Kulhánek

- Status changed from New to Resolved
- % Done changed from 0 to 100

- opraven chybna definice testu:

1. musi byt "screen per 1 ..." ne "screen per", viz <http://physiome.lf1.cuni.cz/psychoacousticstest/psychotest.htm#106>
2. misto "taskpair" jsem zada "task". "taskpair" nema v "screen per 1" vyznam, ma vyznam v "screen per 2"
3. potom je taky klicove slovo "screen per 2 ..." ktery ze vseh radku stimulus vytvori dvojice tj

screen per 2
stimulus 1 2 3
stimulus 4 5

vytvori jednu dvojici ((1 2 3) (4 5)), ktera je zobrazena jako petice 1 2 3 4 5

- Opravena chyba v psychotest-interpret.js prohozeno poradí "screen" "screen per 1" a "screen per 2"
