

Foniatr - Bug #40

problem s RDPWavChannel

23 February 2011 10:58 - Marek Frič

Status:	Resolved	Start date:	23 February 2011
Priority:	High	Due date:	
Assignee:	Tomáš Kulhánek	% Done:	100%
Category:	RealVoiceLab-Matlab	Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
Pri spusteni RVLv9 je problem viz dale, ale ked spustim verzi RVLv5 tak nasledne ide i v9 ??? Undefined variable "cesnet" or class "cesnet.foniatr.RdpPluginServer.RDPWavChannel.isRecording". Error in ==> rdplsRecording at 2 x = cesnet.foniatr.RdpPluginServer.RDPWavChannel.isRecording(); Error in > RealVoiceLab_v9HACE>Action_pushbutton_Callback at 978 if rdplsRecording() Error in > gui_mainfcn at 96 feval(varargin{:}); Error in > RealVoiceLab_v9HACE at 42 gui_mainfcn(gui_State, varargin{:}); Error in > @(hObject,eventdata)RealVoiceLab_v9HACE('Action_pushbutton_Callback',hObject,eventdata,guidata(hObject))			

History

- % Done changed from 0 to 100

rdpstart() zmenen ze skriptu na funkci. Pak inicializace .NET objektu se zavola.
volani rdpstart v RealVoiceLab_v9HACE stejne, nyní vypisuje, jestli jde komunikace pres RDP.
kod upraven na virtualni masine a potvrzen do bzt.
